Office Action Summary	Examiner	Art Unit			
·	Md S. Elahee	2614			
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).					
Status					
 Responsive to communication(s) filed on <u>25 June 2007</u>. This action is FINAL. 2b) ☐ This action is non-final. Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i>, 1935 C.D. 11, 453 O.G. 213. 					
Disposition of Claims					
4) ☐ Claim(s) 1-40 is/are pending in the application. 4a) Of the above claim(s) is/are withdrawn from consideration. 5) ☐ Claim(s) is/are allowed. 6) ☐ Claim(s) 1-9,12-17,20,23-26,28-30,32-34,36-38 and 40 is/are rejected. 7) ☐ Claim(s) 10,11,18,19,21,22,27,31,35 and 39 is/are objected to. 8) ☐ Claim(s) are subject to restriction and/or election requirement.					
Application Papers					
9) The specification is objected to by the Examiner 10) The drawing(s) filed on is/are: a) access Applicant may not request that any objection to the of Replacement drawing sheet(s) including the correction of the original original contents are considered to by the Examiner.	epted or b) objected to by the Edrawing(s) be held in abeyance. DETAILED ACTION

Response to Amendment

This action is responsive to an amendment filed on 06/25/2007. Claims 1-40 are pending. 1.

Response to Arguments

Applicant's arguments filed on 06/25/2007 Remarks have been fully considered but they are not persuasive.

Regarding claims 1, 20 and 23, the applicant argues on page 11-12 that Kang does not teach portable device. However, this argument is **not** relevant because, the examiner did not rely Kang for the teaching of the limitation. Examiner relied upon Kang for the teaching of the selected device/TAD/answering device being integrated into the user device.

Thus the examiner maintains the rejection of the claims in view of Mizikovsky and Kang.

Claim Objections

- 3. Claims 2-19, 26-28 and 30-32 are objected to because of the following informalities:
- regarding claim 2, the phrase "A method" in line 1 should apparently be "The method". Claims
- 3-19, 26-28 and 30-32 are objected for the same reasons as discussed above with respect to claim
- 2. Appropriate correction is required.
- 4. Claims 21, 22, 34-36 and 38-40 are objected to because of the following informalities: regarding claim 21, the phrase "A portable terminal" in line 1 should apparently be "The portable

terminal". Claims 22, 34-36 and 38-40 are objected for the same reasons as discussed above with respect to claim 21. Appropriate correction is required.

Allowable Subject Matter

5. Claims 10-11, 18-19, 21-22, 27, 31, 35 and 39 have already been objected in the previous office action.

Double Patenting

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 1-40 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-32 of U. S. 6,301,338. Because claims in the pending application are broader than the ones in patent, <u>In re Van Ornum and Stang, 214 USPQT61</u>, broad claims in the pending application are rejected as obvious double patenting over previously patented narrow claims. For example, claim 1 of the pending application is the same as claim 1 of the patent except that claim 1 of the pending application does not recite the types of

reply messages. Therefore, claim 1 of the pending application is broader than claim 1 of the patent.

Claim Rejections - 35 USC § 103

- 8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 9. The factual inquiries set forth in Graham v. John Deere Co., 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
 - Determining the scope and contents of the prior art. 1.
 - 2. Ascertaining the differences between the prior art and the claims at issue.
 - Resolving the level of ordinary skill in the pertinent art. 3.
 - Considering objective evidence present in the application indicating obviousness 4. or nonobviousness.
- 10. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 2614

11. Claims 1,7-9, 12-13, 20, 23-26, 29, 30, 33, 34, 37 and 38 are rejected under 35 U.S.C. 103(a) as being unpatentable over **Mizikovsky** in view of **Kang** (US 5,058,150).

As to Claims 1,20,23-25,29,33 and 37, with respect to Figures 1-2 and 5, **Mizikovsky** teaches a method for replying to a call coming to a portable terminal (mobile station 10, Fig.1) wherein, in response to the incoming call,

the portable terminal identifies the caller on the basis of caller ID [i.e., an identification information] (Col. 11, lines 8-15), or

Mizikovsky further teaches directing the incoming call to a selected accessory device such as a telephone answering machine (Col. 12, line 30) to service or answer the call (Col. 12, line 34).

Mizikovsky further teaches selecting an accessory device (i.e., telephone answering machine (hereinafter TAD)) and the device answers or service the call uniquely (such as TAD generates outgoing message (i.e., OGM) or fax machine generates CNG tone (i.e., calling tone) when making a call and sends CED tone when responding an incoming fax call) (Col. 6, lines 51-67, Col. 7, lines 27-30). Thus, the selected device answers the call reads on claimed "reply". Also, each selected device must treat/service the call uniquely therefore, each device can produce a specific form of communication to the incoming call such as TAD generates OGM or fax machine generates CNG tone when making a call and sends CED tone when responding an incoming fax call (Col. 12, lines 25-37).

Mizikovsky further teaches the step of identifying the caller is accomplished by the portable terminal (Figure 1, label 50, Figure 2, label 114 and Figure 5, label 516).

Mizikovsky does not explicitly teach that the portable device sends the reply and provides a selected response to the caller exclusively through the action of the portable terminal irrespectively of which of said plurality of forms of communication is employed in the selected response.

In other words, Mizikovsky does not explicitly teach that a selected accessory device (i.e., TAD) responses are exclusively sent through the mobile terminal. Also, Mizikovsky does not explicitly teach that the selected device (i.e., TAD) is integrated into the mobile device.

Kang teaches that voice analyzing/synthesizing circuit (Fig.2,3, item 221) which is actually telephone answering machine, has been included and integrated into a radio telephone (Fig.2). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to integrate the TAD of Mizikovsky into the mobile station of Mizikovsky so that user are not required to any external connection to connect to the external TAD to get the benefit of carrying both of the TAD along with the mobile station easily as one unit.

As to Claim 7, Mizikovsky teaches a method in accordance with claim 1, wherein said reply is at least partly formulated based on the identification of the calling party (Figure 5, label 506).

As to Claim 8, Mizikovsky teaches a method in accordance with claim 7 wherein a reply is sent to certain identified calling parties only (Figure 5, labels 508,512).

Art Unit: 2614

As to Claim 9, Mizikovsky teaches a method in accordance with claim 7, wherein the reply to be sent in response to the incoming call is different according to the respective company said call is coming from (Figure 5, labels 508,512,516).

As to Claims 12-13, Mizikovsky teaches a method in accordance with claim 7, wherein said identification of the calling party is based on registered caller IDs (a telephone notebook) comprised by the communication (Figure 2, label 106).

As to Claims 26,30,34,38, Mizikovsky teaches a portable terminal in accordance with claim 25, wherein said step of taking response action comprises sending a reply to the caller, said reply being a voice message (one of the following: a voice message, e-mail message, facsimile, and an SMS message in the form of a character string) (Col. 8, lines 51-59).

Claims 2, 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mizikovsky 12. in view of Kang further in view of Jambhekar et al. (US 5,848,356).

As to Claims 2,6, Mizikovsky teaches a method in accordance with Claim 1, wherein the portable terminal sends said reply immediately in response to an incoming call, and said plurality of forms of communication include a voice message.

Mizikovsky further teaches a facsimile peripheral which suggests a facsimile accessory and facsimile message; a multimedia terminal which suggests an e-mail accessory and response; EIA/TIA 15-54 alert messages which suggests a SMS accessory and response.

user by sending pre-programmed responses.

However, Mizikovsky in view of Kang does not teach, "an e-mail message, a facsimile message, and an SMS message in the form of a character string". Jambhekar teaches e-mail, facsimile and SMS messages (Figures 5P and 8A). Having the cited art at the time the invention was made, it would have been obvious to one of ordinary skill in the art to add e-mail, facsimile and SMS capabilities to Mizikovsky's invention in view of Kang's invention for providing callers with response messages as taught by Jambhekar's invention in order not to distract a

13. Claims 3-5,28,32,36,40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mizikovsky in view of Kang further in view of Bremer (US 6,018,671).

As to Claim 3, **Mizikovsky** teaches a method in accordance with Claim 1, wherein in response to an incoming call,

Mizikovsky teaches providing users with alert signals and, therefore, waits for a user response (Figure 5, label 510). However, Mizikovsky in view of Kang does not teach, "the portable terminal alarms and waits during a certain delay, and if a user during said delay does not answer said call, the portable terminal sends said reply". Bremer teaches the limitation (Figure 4, labels 4 16,420). Having the cited art at the time the invention was made, it would have been obvious to one of ordinary skill in the art to add default capability to Mizikovsky's invention in view of Kang's invention for providing callers with default messages as taught by Bremer's invention in order not to keep a caller waiting.

Art Unit: 2614

As to Claims 4,28,32,36,40, Mizikovsky teaches a method in accordance with claim 1, wherein

in response to an incoming call, the portable terminal alarms, and:

Mizikovsky teaches providing users with alert signals and, therefore, waits for a user

response (Figure 5, label 510). However, Mizikovsky in view of Kang does not teach, "if a user

gives a certain key command, the portable terminal sends said reply". Having the cited art at the

time the invention was made, it would have been obvious to one of ordinary skill in the art to add

selected message capability to Mizikovsky's invention in view of Kang's invention for

providing callers with selected messages as taught by Bremer's invention in order not to keep a

caller waiting.

As to Claim 5, Mizikovsky teaches a method in accordance with claim 3, wherein the portable

terminal gives a mute soundless alarm (Col. 6, lines 43-50).

14. Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over Mizikovsky in

view of Kang further in view of Villa-Real (US 4,481382).

As to Claim 14, Mizikovsky teaches a method in accordance with claim 7.

Mizikovsky teaches providing selected accessory responses to callers (Figure 5, label

518). However, Mizikovsky in view of Kang does not teach, "wherein a reminder to call the

identified calling party will be stored into the portable terminal, in order to be presented to a user

later". Having the cited art at the time the invention was made, it would have been obvious to

one of ordinary skill in the art to add reminder capability to Mizikovsky's invention in view of

Art Unit: 2614

Kang's invention for alerting users as taught by Villa-Real's invention in order to provide reminders to users when calls become due.

15. Claims 15-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mizikovsky in view of Kang further in view of Wolff et al. (US 5,327,486).

As to Claims 15-17, Mizikovsky teaches a method in accordance claim, 1, wherein said reply includes:

Mizikovsky teaches providing callers with selected user accessory responses (Figure 5, label 518). However, Mizikovsky in view of Kang does not teach, "time information". Wolff teaches the limitation (Figures 8-9). Having the cited art at the time the invention was made, it would have been obvious to one of ordinary skill in the art to add time capability to Mizikovsky's invention in view of Kang's invention for providing callers with selected time-based messages as taught by Wolff's invention in order not to keep a caller waiting.

Conclusion

16. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Md S. Elahee whose telephone number is (571) 272-7536. The examiner can normally be reached on Mon to Fri from 8:30am to 5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Fan Tsang can be reached on (571) 272-7547. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
